Allowable Subject Matter

Claims 1 – 20 are allowed. The prior art of record fail to teach a method for controlling a motor vehicle comprising, among other limitations, *receiving an engine base torque level indicating slowly changing torque produced by the engine; receiving a request for fast desired torque; determining as a motor torque a difference between the fast desired torque and the engine base torque level – the difference being limited by at least one motor torque availability limitation; determining as an engine fast torque a difference between the request for desired torque and the motor torque; determining as the motor torque request the motor torque; and determining as the engine torque request the engine fast torque; determining a first propelling source torque request based on a difference between the request based on a difference between the request for fast desired torque and a second propelling torque source request; and providing the first propelling source torque request and the second propelling torque source request to the plurality of torque producing sources, whereby the motor vehicle is controlled.*
